### DETAILED ACTION

1. Claims 1-46 are pending and examined
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103© and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1-46 are rejected under 35 U.S.C. 103(a) as being unpatentable over *WO 94/02613* (F2).

Present invention is directed to a method for inducing an immune response to a feline immunodeficiency virus (FIV) in a human or an animal that is susceptible to infection by FIV. *WO 94/02613* discloses FIV and development of vaccines for use in protecting cats and kittens against FIV infection (page 1, first paragraph).

Art Unit: 1648

It would have been prima facie obvious for one of ordinary skill in the art at the time the invention was made to use *WO 94/02613* teachings to induce an immune response to FIV in a human or an animal that is susceptible to infection by FIV because that is what "FIV vaccine" does. The method of inducing such immune response is already disclosed in *WO 94/02613*, whether it is for human or any other animal.

4. No claim is allowed.

5. Papers relating to this application may be submitted to Group 1600 by facsimile transmission. Papers should be faxed to Group 1600 located in Crystal Mall 1. The Fax number for Art Unit 1648 is (703) 308-4426. All Group 1600 Fax machines will be available to receive transmissions 24 hrs/day, 7 days/wk. Please note that the faxing of such papers must conform with the Notice published in the Official Gazette, 1096 OG 30, (November 15, 1989).
